

MyVeloFit for Fitters, Shops & Training Centers

Empower Every Rider, Grow Your Business

Background & Purpose

Professional bike fitters and cycling businesses face the challenge of delivering accurate, personalized fits to a wide variety of riders — from first-time cyclists to elite racers. Traditional equipment and software solutions are expensive, training intensive and time consuming to deploy and use. MyVeloFit gives you a powerful digital platform to scale your expertise, reach more riders, and provide ongoing value beyond the in-person session. It bridges the gap between your knowledge and the modern rider's expectations for convenience, accessibility, and data-driven insights.

What is MyVeloFit?

MyVeloFit is a digital bike fitting and sizing solution that uses advanced motion analysis to evaluate rider position, provide accurate position and angle analysis, and suggest incremental bike adjustments to improve positioning. Capture on-bike video using a smartphone and bike trainer or rollers in your studio, then upload for results. The platform generates personalized fit recommendations quickly, and you can layer your own expertise through optional reviews or follow-ups. It's the ultimate hybrid tool to increase sales value, extend your reach and improve client outcomes.

Key Features

- **Video-Based Motion Analysis** – Simple, accurate assessments from a phone camera.
- **Scalable Rider Management** – Fit more cyclists with less time investment.
- **Mobility & Training Programs** – Support long-term comfort and performance.
- **Bike Sizing Tool** – Help customers select the right frame before they purchase.
- **Flexible Use** – Works in-studio, remote, or as an ongoing follow-up resource.

Benefits for Fitters & Businesses

- **Increase Efficiency** – Save time on initial assessments and routine adjustments.
- **Enhance Credibility** – Provide a tech-forward, data-backed experience.
- **Create New Revenue Streams** – Offer digital follow-up services or subscription packages.
- **Support Client Retention** – Deliver ongoing value that keeps riders coming back.

Who It's For

- Professional fitters seeking hybrid tools to complement in-person expertise.
- Local bike shops looking to provide differentiated and premium services with scalability.
- Training centres, teams or coaches supporting athletes who need ongoing fit adjustments.

Competitive Context

Traditional fitting systems require expensive equipment, studio visits, and limited follow-up. Static sizing charts leave too much uncertainty. MyVeloFit combines the **accessibility of digital tools** with the **credibility of professional expertise** — creating a scalable, flexible platform that benefits both businesses and riders.

A Fitter's Story

"As a shop fitter, I used to only help the cyclists who could make it into the store. Now, with MyVeloFit, I can support riders before they buy, fine-tune their fit after the sale, and even provide follow-up checks remotely. It's helped me build stronger relationships, deliver better results, and grow a steady stream of new and repeat customers."
